BMS

Rob Mulcahy
Project Engineer

BMS

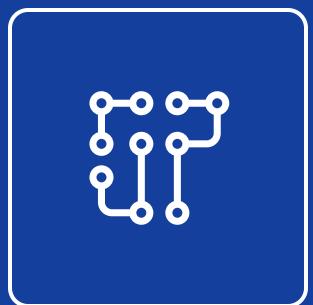

WHAT IS IT?

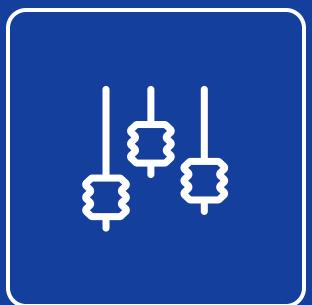

Building Management
System

System of sensors,
valves and control
software that controls
mechanical systems

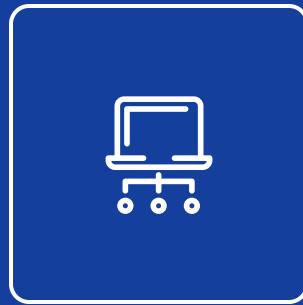

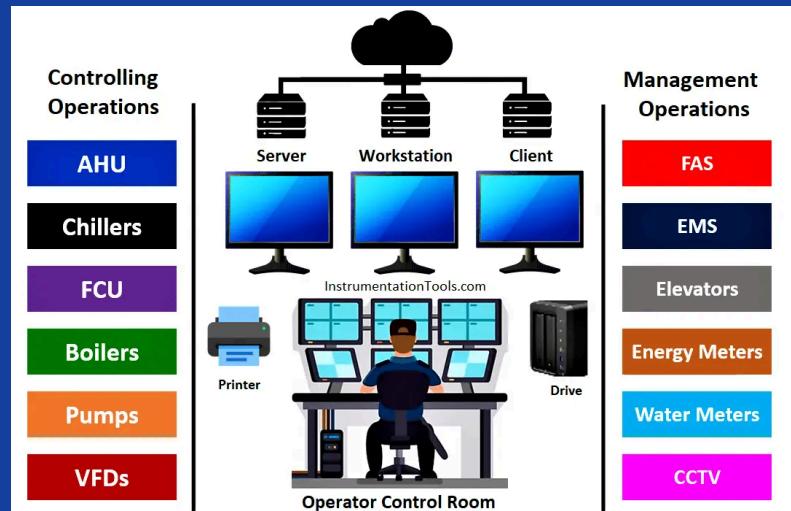

Maintains correct
operating conditions
in data center

BMS

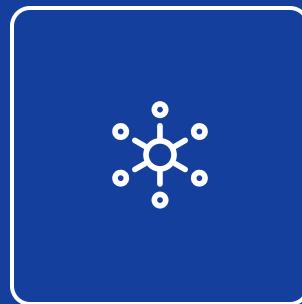

WHY IS BMS USED?

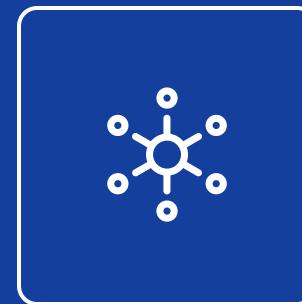

Single control system for monitoring data center conditions

BMS

WHERE IS BMS INSTALLED?

Distributed throughout the building

Computer in operations center to
monitor and control

BMS

WHO INSTALLS?

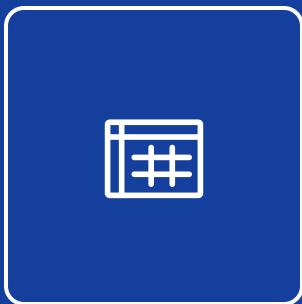

BMS contractor will design, install
and test system

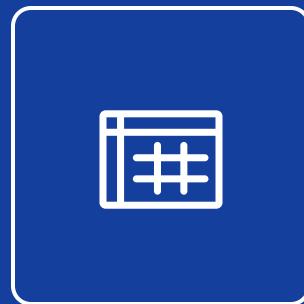

Coordination with equipment
providers needed

BMS

WHEN IS IT INSTALLED?

Input from contractor required

System should be ready for Power On
